

# Kimberly E. Willis – Instructional Design E-learning Samples 8/24

This document provides links to some of my e-learning work. Please contact me at [kimewillis6@gmail.com](mailto:kimewillis6@gmail.com) for samples of my instructor-led courses and technical writing.

## Automation Overview

Click [here](#) to view this course.

I developed this introductory-level microlearning as part of Red Hat's Ansible sales enablement training. This is the first course in the Ansible sales enablement training. For the embedded videos, I developed detailed storyboards of what I wanted the videos to look like and had stakeholders review the storyboards. After I got final approval for the storyboards, I sent them to a vendor (Aptara), who developed them in Articulate Storyline. I then embedded the Storyline videos in my Rise course.

## Common Customer Needs

*Developed using Articulate Rise and Storyline*

I developed this tutorial for Carolina Biological Supply, a scientific supply company. They supply microscopes and biology courses to college students. I developed a simulation of a microscope (also using Storyline), and then created lab activities using this digital microscope for each biology course I developed for them. This tutorial walks the student through each step of using the digital microscope to view specimens.

## Bacterial Shapes

*Developed Using Articulate Storyline*

Click [here](#) to view this course.

This is another course I developed for Carolina Biological Supply. To develop this course, I translated an existing instructor-led course into an e-learning module. I manipulated the bacterial shape images using free image editing software.

**Accelerating Managers Program: Leading Through Change**

*Developed Using Articulate Rise*

Click [here](#) to view this course.

I developed this microlearning for DoorDash as part of their leadership training. I developed the course using Articulate Rise.

**Accelerating Managers Program: Building Inclusive Teams**

*Developed Using Articulate Rise and Storyline*

Click [here](#) to view this course.

I developed this microlearning for DoorDash as part of their leadership training. I developed the embedded videos using Storyline, and developed the rest of the course using Rise.

**Accelerating Managers Program: Self-Awareness for Leaders**

*Developed Using Articulate Rise*
